About This Game

It's been 2 years since the first self conscious AI were created. All seemed fine, until one day, the AI rebelled. Amidst the chaos, a digital system CYCOM, was created and spread across the internet for everyone to try and destroy the AI threat. All have failed, will you as well?

CYCOM: Cybernet Combat is a fast paced multiplayer strategy game, combining the real time battling of shooters and the strategy of trading card games.

I'm going to give this a thumbs up for now since we are in EA, but I hope to see more levels in the story mode! GG so far Jeremy!. Nice action and graphics. I enjoyed the game play and the selection of weapons. Thumbs up!. It's a good concept, but there isn't much depth to this game. You and robots shoot at each other while moving on a grid, but every so often you get a set of five RANDOM power ups (most of which aren't very helpful). This game lacks a pause button, which is annoying in "story" mode because the boss is super annoying. Story is in quotes because it's pretty much just 7 levels and then a boss, the same every time. I haven't tried the multiplayer, maybe that will be redeeming.

Edit: Developer has taken my criticism and is actively working on the game, so there's hope yet!
