The screenshot shows the 'Any Video Converter' application window. The main area contains a table of video files with columns for Name, Duration, Format, Video Size, FPS, and Status. The 'Status' column shows various states like 'Waiting', 'Aborted', and 'Completed'. On the right, there are several expandable sections for output profiles: 'Mobile Phone', 'Flash Video', 'Common Used Video Formats', and 'Common Used Audio Formats'. The 'Common Used Audio Formats' section is currently expanded, showing options like MP3, OGG, WAV, AAC, and WMA. At the bottom, there is a status bar with a message: 'Cannot get media information of video file C:\Users\ionut\Documents\Any Video Converter\MetaCafe\Key Magic Stick - Video_002.flv, insert failed!'.
